

## ASSIGNMENT 1 — INTRODUCTION TO MS EXCEL

Course: Artificial Intelligence (Machine Learning & Deep Learning)

Name: \_\_\_\_\_ Roll No: \_\_\_\_\_ Date: \_\_\_\_\_

**Instructions:** Answer Section A briefly in your own words. Perform Section B practically in Microsoft Excel. Submit both required files as described at the end.

### Section A — Short Theory Questions

- 1 What is MS Excel and what is it primarily used for?
- 2 Define the following terms: Cell, Row, Column, Worksheet, Workbook.
- 3 What is the difference between a formula and a function in Excel?
- 4 What is a cell reference? Differentiate between relative and absolute reference.
- 5 Name any four commonly used Excel functions and briefly state their purpose.

### Section B — Practical Tasks (perform in Excel)

- 1 Open Excel and create a new workbook. Rename Sheet1 to "Assignment1".
- 2 Enter a small dataset: 5 students, with columns for Name and Marks in 3 subjects.
- 3 Use the **SUM** and **AVERAGE** functions to calculate total and average marks for each student.
- 4 Apply basic formatting: bold headers, cell borders, and a background color for the header row.
- 5 Use **Conditional Formatting** to highlight any subject mark above 80.
- 6 Insert a simple bar chart showing total marks of each student.

**Submission Requirements:** Submit the following two files — (1) a **.txt** file containing your written answers to Section A, and (2) an **.xlsx** Excel file containing your completed Section B worksheet. Name your files as **Assignment1\_YourName.txt** and **Assignment1\_YourName.xlsx**.
